Week 2 - Core - Worksheet | AI Solution Design & Development - Refines workflows by improving structure, sequencing and tool selection

Name: _____ **Class:** _____ **Date:** _____

Before and after: reordering and one tool swap turn a clumsy workflow into a reliable one.

Spot the problems

Find three things wrong with the draft workflow. For each, name the lever: structure, sequencing or tool.

Problem in the draft workflow	Lever (structure / sequencing / tool)

My refined workflow

Write your steps in the new order. For each, name the tool and say why it belongs there.

Order	Tool chosen	Why this tool here
1		
2		
3		
4		

Verify it

Pick one figure in your output. How did you check it was correct against the reference?

Exit ticket

Exit ticket - Name one change you made under each lever - structure, sequencing and tool selection - and explain how each one made your output more reliable.

_____

_____

Challenge (stretch)

Challenge - Apply the skill to a more complex case and justify the approach: add a step that translates the notice into Arabic, decide exactly where it belongs in your sequence and which tool does it, then explain why that placement keeps the output correct. This stretches toward the Proficient outcome of designing and justifying multi-step AI workflows for real audiences.
