Week 4 - Lab - Worksheet | Ethics & Governance - Build a responsible-use plan for a harder case

Name: _____ **Class:** _____ **Date:** _____

Rank each risk by impact and likelihood, then aim your strongest measures at the top-right.

Stakeholder - Risk - Rank

List each stakeholder, their main risk, and a rank from impact and likelihood (High/Med/Low).

Stakeholder	Main risk	Impact x likelihood rank

Responsible-use plan

For your top two risks, write a measure, its trade-off, and a because. Then justify the whole plan.

Tool log - Card decks (bias-source cards) + packs (reduce risks / responsible use)

Record as you work. Goal: A risk-reduction record: risk, cause, who is affected, and a proposed action.

Step	What I did	What I saw / result
1	Read a bias-source card and the paired outputs.	
2	Identify the risk or unfairness and its likely cause in th	
3	Say who could be affected.	

4	Propose one concrete action to reduce the risk and improve	
5	Predict how the action would change the output.	

Risk-reduction plan

Risk / unfairness	Likely cause	Who is affected	Action to reduce it

Safety check (tick): I used no personal data (no faces, voices or names). ☐

Exit ticket

Exit ticket: name the weakest trade-off in your plan and explain why you still accept it.

_____

Challenge (stretch)

Challenge (stretch): redesign one measure so it protects people just as well but at a lower cost, and argue why your version is better - moving toward the Proficient outcome of optimising responsible-use measures, not just proposing them.
